

Economic and Social Research Foundation

ECONOMIC MANAGEMENT AND BUDGET ANALYSIS

**Short Course Announcement:
10th - 14th September 2018**

Introduction

The Economic and Social Research Foundation (ESRF), a policy research institute based in Dar es Salaam, Tanzania undertakes and articulates research aiming at enhancing the understanding of policy options and development management in Tanzania. When the Government of Tanzania decided to guarantee the creation and registration of ESRF in 1993, it was out of the need of having an independent think tank in Tanzania.

The ESRF was therefore tasked with undertaking triple objectives of economic management research, capacity development in different sectors and knowledge management.

Since its creation, the ESRF has consolidated its reputation as a national centre of excellence and is positioned to realize its target of becoming a regional centre of excellence in capacity development and research for policy analysis.

The ESRF implements activities geared towards strengthening capacity of intellectual resources of both producers and users of knowledge in Tanzania. Within this mandate, the ESRF is hereby announcing a one week training course on Economic Management and Budget Analysis to be conducted from Monday 10th to Friday 14th September 2018.

Rationale of the course

One of the feedbacks that the ESRF has received from various Ministries, Departments and Agencies is demand for training in areas related to development management as a whole and budget analysis in particular. It is in response to this demand that the Foundation is motivated to conduct the current training on Economic Management and Budget Analysis.

The ESRF had conducted training courses in these areas in the past thus the current training course builds on experiences and lessons gained to date. However, focus of the course contents has been improved to address capacity needs for development management in the context of today's social economic landscape.

While the course is primarily targeted at building the capacity of economists and planning officers in both central and local government in Tanzania; many other working professionals in the public and private sector as well as CSOs/ NGOs will find the course relevant.

Course content

The course will cover the following items.

(i) *Introduction to economic management*

This session will introduce the participants to the meaning of development management. In doing this, the session shall dwell on elucidating some key goals for economic management including economic growth and economic development. The session shall also expound on different players participating in the economy as well the role of state in development management. The session shall also elucidate in a nutshell the centrality of national budget in economic management.

(ii) Instruments of economic management: Monetary and Fiscal policies

Monetary and fiscal policies are some of the key tools that governments use in steering the economy in the right direction. This session aims at making the participants understand the instruments and their applicability in economic management process. Training on these important instruments will include both theory and practice. As such, in addition to main trainers who will mostly cover theory, the session shall also be facilitated by guest speakers from Bank of Tanzania and Ministry of Finance and Planning who will cover monetary and fiscal policies from a practical perspective.

(iii) An overview of economic transformation

Over the past two decades, the term “economic transformation” has become not only a buzzword but also a real development objective in many developing countries. As articulated in Tanzania Development Vision 2025 and Second Five Years Development Plan 2016/17 – 2020/21 “Nurturing Industrialization for Economic Transformation and Human Development” economic transformation forms the heart of country’s development goal. However, this concept is not well understood among many economists/planners. This session will aim at educating the participants on the meaning and relevancy of economic transformation for today’s Tanzania. The session shall also dwell on discussing the structure of the Tanzanian economy and the nature of the ongoing transformation in Tanzania.

(iv) Tanzania policy development process in a historical perspective

Tanzania has a rich history of policy making since independence; unfortunately, most citizens including economists and planners are imperfectly acquainted with this history of policy making in the country. This session will therefore focus on illuminating planning process in Tanzania from a historical perspective and drawing lessons that experience for

current policy concerns. The session will be facilitated by economists who have long and rich history of involvement in planning processes in Tanzania since independence.

(v) Budget Analysis

National budget is certainly one of the key instruments used by governments in economic management. This session will introduce the participants to the budget process, the budget cycle and roles of different entities in the budget cycle. The session will also dwell on components of the budgets and key techniques to be used by economists/planners in analysis and interpreting national budget. In addition to the main trainers, this session shall include guest speakers from Ministry of Finance and Planning who will provide the participants with an understanding of budget analysis from a practical perspective.

(vi) Current development challenges and their relevance to planning

Today's world is characterized by important development challenges which need to be understood and taken into account in the planning process. This topic will address such challenges including the concept of green economy and integration of climate change issues in planning processes. The course shall address in sufficient detail implications of population issues (demographics, urbanization, etc) on planning and budgeting.

(vii) Global and regional process with implication to planning in Tanzania

Tanzania as a member of global development community has ratified a number of commitments with implications to planning and budgeting. In this session, the participants shall be refreshed on a few of such commitments especially Agenda 2030 for Sustainable Development (SDGs), Africa Agenda 2063, EAC 2050, Maputo Declaration (agriculture) and Abuja Declaration (health) etc.

Facilitators

The course shall be facilitated by three economists with vast knowledge and rich experience on development management in Tanzania and developing countries. The training shall also benefit from presentations from guest speakers from Ministry of Finance and Planning and Bank of Tanzania.

Professor Samuel Wangwe

Professor Samuel Wangwe has more than 40 years of experience as an economist, policy researcher, policy analyst, policy advisor, and as economist and an economic advisor to the Government of Tanzania.
